

Husain AlMusawi

Director - Technology

Husain AlMusawi brings over 25 years of extensive experience in the telecommunications sector, with a strong focus on strategy, product development, systems implementation, and project management.

His expertise includes building certified data center facilities, developing hosting-related products, designing ICT and cloud strategies, and creating comprehensive roadmaps for their implementation. Husain has spent 12 years in the financial sector within the Middle East, leading Information Technology divisions, to build and manage cloud-enabled IT infrastructure and designing data center facilities that meet stringent security, backup, and geographical redundancy requirements. He played a crucial role in the design, construction, and product development rollout of three data centers for Bahrain Telecommunications company. This project included two Tier-III certified data centers, boasting a combined capacity of over 560 racks, ensuring that these facilities met stringent standards for reliability and performance.

Husain holds a Bachelor's Degree in Media Technology from the University of the West of Scotland. He is also certified in multiple data center specializations, Amazon Web Services, and various related professional disciplines
